# Example of using the class

```

```
# Create an instance of the PublicHealthSafety class

# Adding sample safety incidents
    "Car Accident" "Main Street" "2025-02-24"
    "Fire" "Downtown Area" "2025-02-23"

# Adding sample health events
    "Flu Outbreak" "Community Hospital" "2025-02-20" 150
    "COVID-19 Surge" "City Center" "2025-02-22" 500

# Displaying the statistics and report
```
